EDUCATION

Chennai Institute of Technology

Chennai, Tamil Nadu

Bachelor of Engineering in Computer Science (AI & ML) — **CGPA: 8.12/10**

Expected 2029

TECHNICAL SKILLS

Languages:	C, C++, Python, Java, JavaScript
Frontend:	HTML5, CSS3, React, Vite
Backend & APIs:	Node.js, Express, FastAPI, REST API Integration
AI & Machine Learning:	Machine Learning, Logistic Regression, Gemini / LLM Integration
Core CS:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Computer Networks
Databases & Tools:	MongoDB, Git, GitHub, VS Code, Vercel
Visualization & Reporting:	Chart.js, PDFKit

PROJECTS

GoHealthy AI – Preventive Health Risk Estimation | *Python, Machine Learning, Logistic Regression, FastAPI, React/Vite*

- Engineered a preventive health ML web platform that assesses risk levels for diabetes, heart disease, and hypertension using self-reported lifestyle and clinical inputs.
- Implemented Logistic Regression models with standardized preprocessing and held-out evaluation to surface key risk factors.
- Integrated trained ML models with a FastAPI backend and React/Vite frontend interface for real-time predictions via API communication.

AeroCast AI – Enterprise Weather Intelligence Platform | *Node.js, Express, Weather APIs, Gemini 1.5 Flash, Chart.js, PDFKit*

- Developed a full-stack weather platform featuring real-time observations, hourly and 7-day forecasting, multi-city analytics, grounded Gemini AI synthesis, and vector PDF exports.
- Architected multi-provider API fallback using OpenWeatherMap/Open-Meteo alongside deterministic meteorological rules and dynamic Chart.js visual reporting.

Weather Report Generator | *Node.js, Weather API, PDF Generation*

- Built an automated weather utility that fetches live API data, transforms payloads into structured schema, and programmatically exports downloadable PDF weather reports.

Personal Portfolio Website | *HTML5, CSS3, JavaScript, Vercel*

- Designed and deployed a responsive personal portfolio website showcasing technical projects, skill set, and academic highlights on Vercel.

ACHIEVEMENTS

- Future Coders Mega Expo – Junior Hackathon:** Secured 2nd Place in a sustainability-focused challenge.
- AI for Sustainability Hackathon 2026:** Qualified for Round 2 with an AI-driven sustainability solution.
- LeetCode:** Solved 200+ problems, building strong core competency in Data Structures & Algorithms.

RESEARCH & EXTRACURRICULAR

- Continual Machine Learning Research:** Conducting ongoing research focused on continual learning approaches and actively preparing a research paper.

CERTIFICATIONS

- CS50x: Introduction to Computer Science & CS50P: Programming with Python** – Harvard University
- AWS Cloud Practitioner | Cisco Python Essentials 1 & 2 | Deloitte Cyber Job Simulation**
- MongoDB Learning:** MongoDB Basics for Students, RAG Applications, AI Agents, Vector Search
